

Panel A: Collapse Entropy Landscape

Panel B: Resonance Coherence Visualization

$$\Gamma(\psi) = (\sum \lambda_i^2) / (\sum \lambda_i)$$

Panel C: CSI Calculation Framework

$$\text{CSI} = [1/\epsilon_{\text{collapse}}] \cdot \Gamma$$

Molecule	$\epsilon_{\text{collapse}}$	Γ	CSI
Benzene	0.42	2.87	6.83
Cyclohexane	0.67	1.54	2.30
Hexane	0.89	1.32	1.48
Naphthalene	0.36	3.12	8.67

Panel D: Temperature Dependence
